E.A.G./BCM CARBINE

Bravo Company MFG, Inc. has been an industry leader for years in offering very high-quality AR-15/M16/M4 parts to the commercial market. This product line has quickly become one of the first choices among professional shooters. Bravo Company MFG, Inc. is continuing to expand its line of complete AR-15 rifles and carbines.

E.A.G. Tactical has teamed up with Bravo Company to offer the E.A.G. Tactical Carbine package. This package comes out of the box with all the most popular upgrades often purchased separately by serious shooters. The package features high-quality accessories from LaRue Tactical, TangoDown, Magpul, VTAC, SureFire, and the world-class BCM BFH (cold hammer forged barrel), all with the advanced mid-gas system.

While instructing at E.A.G. Tactical, Pat Rogers oversees a firing schedule of approximately 650,000 rounds each year. That experience provides an opportunity to see which carbines are truly built to withstand the rigors of professional use.

Pat has been running Bravo Company carbines in classes since 2005.

E.A.G. TACTICAL THREE-DAY CARBINE OPERATORS COURSE

E.A.G. Tactical is owned by Pat Rogers. After an extensive career of service, retiring as a Chief Warrant Officer of the Marines and NYPD Sergeant, Pat founded E.A.G. Tactical in 1992 to provide training to the U.S. Military, other U.S. government agencies, law enforcement departments, and properly vetted private U.S. citizens.

Pat is recognized as an industry leader in the weapons training community, as he incorporates his lifetime of real-world experience on the battlefield and the streets into contemporary training doctrine.

This sweepstakes includes E.A.G. Tactical's three-day carbine operators course. This is a moderate-intensity course that emphasizes fighting with 5.56x45mm, 5.45x39mm or 7.62x39mm carbines. It is not a shooting course—it is a fighting course.

AIMPOINT MICRO T-1 WITH LARUE MOUNT

No matter what your mission, the size and weight of your equipment are critical factors, so an Aimpoint Micro T-1 with LaRue mount is included in this prize package. With the Micro T-1, Aimpoint introduced an aiming system that provides the performance of their full-sized sights in the smallest possible package. Built to offer the same battle-proven ruggedness as other Aimpoint products, the Micro T-1 is able to perform under extreme conditions while adding negligible weight to your weapon. The T-1 has six NVD-compatible brightness settings and seven daylight settings, including one extra-bright setting, making the Micro T-1 ready for use around the clock.

With a top-quality optic, never settle for second best when it comes to choosing a mount. LaRue mounts have earned the reputation of being the strongest combat mounts available, and are the mount of choice among savvy gunhandlers.

ASYM PRECISION AMMUNITION

So the winner won't be short on ammo for the course, included in this package are 1,500 rounds of ASYM Precision's 5.56mm Precision Training ammunition. Also included are 250 rounds of premium match-grade handgun ammunition, in either .45 ACP or 9mm.

ASYM Precision Ammunition is premium quality ammunition, meticulously manufactured from the finest components on state-of-the-art equipment by premier custom gunmaker Stan Chen Customs. Each load is carefully developed for its intended purpose, and every round is hand inspected and chamber checked in a minimum spec gauge to ensure flawless function and performance.

According to Pat Rogers, "ASYM provides superior quality ammunition at a reasonable price. We have been using it for awhile now, and our experience in both using it as well as observing it being used in our training courses has exceeded expectations. We heartily recommend ASYM ammunition for use in our classes."
